

VICTORIA PARK

COMPANY PROFILE

VICTORIA PARKLAND CO., LTD.

DEVELOPER OF "VICTORIA PARK" – TAKMAO CITY, KANDAL PROVINCE, CAMBODIA

1. COMPANY OVERVIEW

Victoria Parkland Co., Ltd. is a Cambodian real estate development company established to develop and manage **Victoria Park**, a strategic mixed-use residential and commercial development located in **Takmao City, Kandal Province**, near Phnom Penh and the new Techo International Airport growth corridor.

The company's vision is to create a modern, green, well-planned, and lifestyle-focused community that responds to Cambodia's next phase of urban expansion. Victoria Park is designed not only as a land development project, but as a long-term urban community combining residential living, commercial activities, investment opportunities, and future mixed-use facilities.

The project aims to serve local buyers, investors, developers, financial institutions, business owners, and future residents who are seeking a high-potential location with clear infrastructure growth and long-term capital appreciation.

2. PROJECT NAME

VICTORIA PARK

3. Project Owner / Developer

VICTORIA PARKLAND CO., LTD.

With over 15 years of experience in legal frameworks, public administration, and investment advisory, he provides strategic guidance on regulatory compliance, governance, and public-private collaboration.

H.E. MET MAKARA

- **Secretary of State of the Ministry of Social Affairs, Veterans and Youth Rehabilitation**
- **Board Advisor of Victoria Parkland Co., Ltd.**

4. Project Location

**Takhmao Town, Kandal
Province, Cambodia**

Strategically positioned
within the southern Phnom
Penh expansion zone,
Victoria Park benefits from
proximity to:

- Phnom Penh City
- Takhmao Town Center
- Major national roads and future infrastructure connections
- Techo International Airport development corridor
- Emerging residential, commercial, and logistics growth areas

5. Development Vision

Victoria Park is envisioned as a **modern green urban community** that balances real estate value, lifestyle quality, environmental consideration, and practical market demand.

The project is not designed as a “concrete jungle.” Instead, the development concept focuses on:

- Green spaces
- Wide internal roads
- Organized residential zoning
- Commercial convenience
- Community lifestyle
- Practical urban planning
- Long-term investment value
- Future mixed-use development potential

Victoria Park aims to become a new-generation community where people can live, invest, work, operate businesses, and enjoy a better urban environment.

6. Development Concept

The total project area is approximately **50 hectares**, planned with two major development zones:

A. Residential Development Zone – Approx. 30 Hectares

This zone is planned for residential land plots and landed property development, including:

- Villa plots
- King villa plots
- Shophouse plots
- Private residential lots
- Future serviced residential products
- Green neighborhood streets
- Internal roads and infrastructure

The residential zone is designed for families, investors, and buyers who want to own land in a strategic growth area close to Phnom Penh and the new airport corridor.

B. Mixed-Use Development Zone – Approx. 20 Hectares

This zone is planned for future commercial and mixed-use development, including:

- Condominium development
- Community mall
- Retail and commercial facilities
- Parking areas
- Lifestyle facilities
- Possible hospitality or serviced residence components
- Future partnership opportunities with investors and developers

This mixed-use zone creates strong future potential for joint ventures, development partnerships, and long-term recurring income.

7. Key Project Components

Victoria Park is planned to include:

- Residential land plots
- Villa land plots
- King villa plots
- Shophouse development
- Commercial land areas
- Mixed-use development areas
- Community mall concept
- Green parks and landscape areas
- Wide internal roads
- Utility infrastructure
- Drainage system
- Street lighting
- Security and estate management
- Future EV-ready parking and community facilities

8. Strategic Positioning

Victoria Park is positioned as a **strategic land and lifestyle investment opportunity** in one of Cambodia's most important future urban expansion corridors.

The project focuses on four main value drivers:

1. Location Growth

The area benefits from the growth of Phnom Penh's southern expansion and future airport-related development.

2. Land Value Appreciation

As infrastructure improves and urban expansion continues, land in well-planned locations is expected to gain stronger long-term value.

3. Practical Market Demand

The project provides land plots and shophouse opportunities that match real buyer demand, rather than relying only on oversized high-rise development.

4. Development Flexibility

With residential and mixed-use zones, Victoria Park can support multiple development models, including land sales, joint ventures, commercial leasing, and future development partnerships.

9. Target Market

Victoria Park targets the following groups:

- Local Cambodian families
- Phnom Penh residents seeking land ownership
- Business owners
- SME operators
- Real estate investors
- Land banking investors
- Developers seeking partnership opportunities
- Banks and financial institutions
- Overseas Cambodian buyers
- Long-term institutional or strategic investors

10. Business Model

Victoria Parkland Co., Ltd. may generate revenue through several channels:

A. Land Plot Sales

Sale of residential land plots, villa plots, king villa plots, and shophouse plots.

B. Developer Partnership

Joint venture or development partnership for the mixed-use zone, including condominium, mall, retail, and hospitality components.

C. Commercial Development

Future development of retail, community mall, commercial facilities, and leasing opportunities.

D. Estate Management

Long-term property management, security, landscaping, maintenance, and community services.

E. Strategic Investment Partnership

Opportunity for banks, investors, and developers to participate through financing, JV structure, project partnership, or infrastructure support.

MASTER PLAN BIRD EYE VIEW

VICTORIA PARK

TAKHMAO TOWN

MASTER PLAN BIRD EYE VIEW

An aerial photograph of a large-scale urban development. The central part of the image shows a dense grid of low-rise residential buildings, likely townhouses or small apartments, arranged in neat rows and columns. To the right of this grid, there is a cluster of much taller, modern high-rise apartment buildings. The entire development is surrounded by lush green trees and vegetation. A major road with a roundabout is visible in the top left corner. In the bottom right, there are some commercial or recreational facilities, including what looks like a swimming pool and some open spaces.
